Chakravarthi Chintapatla

Full-Stack Software Engineer | React Native, TypeScript, Go, Rust | AI Agents and LLM Apps

Email: cto@treatoapp.com | LinkedIn: linkedin.com/in/chintapatla-chakravarthi | GitHub: github.com/VanitasCaesar1
Portfolio: vanitascaesar1.github.io | Location: India | Open to relocate to Bengaluru, Mumbai or Delhi NCR, or remote | Available to join soon

SUMMARY

Full-stack software engineer and co-founder/CTO of Treato, a healthcare platform in India. Took it from an empty repository to production: two React Native apps live in the app stores, a Go and PostgreSQL backend, a Rust auth service, a Tauri desktop app and an LLM-powered AI agent, with about 3,500 commits since March 2025. Owns features end to end, from schema and API design to mobile UI, deployment and on-call.

EXPERIENCE

Co-founder & CTO (Full-Stack Software Engineer), Treato Oct 2024 - Present | Remote, India

Healthcare platform connecting patients, families, doctors and clinics around one shared health record.

- **Mobile apps:** Shipped Treato Doc (doctors) and Treato Health (patients) in React Native, Expo and TypeScript: booking, family health records, real-time chat (Elixir, Phoenix Channels, WebSockets) and video visits on self-hosted LiveKit (WebRTC). Treato Doc is live on the App Store and Google Play.
- **AI agent:** Built Maya, an LLM tool-calling agent in Go that explains prescriptions and lab reports, sets medicine reminders and gives doctors a daily brief. Guardrails: red-flag checks run before the model; clinical output stays a draft until a doctor approves it (human in the loop).
- **Backend and APIs:** Designed the core REST API in Go (Fiber) on PostgreSQL (about 360 schema migrations), a GraphQL read layer, RabbitMQ between microservices, Elasticsearch search and Dragonfly (Redis) caching.
- **Authentication and security:** Wrote the auth service in Rust: phone OTP, passkeys (WebAuthn) and one identity across patient, doctor and clinic roles (RBAC).
- **Desktop and web:** Tauri desktop app for clinic front desks (queue, walk-ins, billing) with signed macOS/Windows builds and auto-update; Next.js website with a public doctor directory.
- **DevOps and infrastructure:** Run production on a Linux VPS with Docker and Dokploy: CI/CD with GitHub Actions, Playwright end-to-end tests, backups, monitoring and on-call.

Advisor, [24]7.ai Apr 2025 - Sep 2025 | Bengaluru, India

- Handled customer support and sales conversations for enterprise clients in a high-volume contact centre.

PROJECTS

- **ZVault** (Rust, open source): secrets manager that keeps API keys out of AI coding tools; AES-256-GCM, shipped via Homebrew.
- **ButterUI** (TypeScript, React Native, open source): transitions and portals, packaged as agent skills for Claude Code, Cursor and Codex.
- **expo-hot-toast** (TypeScript, Expo, open source): toasts for Expo with Apple Liquid Glass on iOS 26+.

SKILLS

Languages: TypeScript, JavaScript, Go (Golang), Rust, Elixir, SQL, Kotlin, C

Frontend and mobile: React Native, Expo, React, Next.js, Tauri, iOS and Android app release

Backend: Node.js, Go Fiber, Phoenix, REST APIs, GraphQL, WebSockets, microservices, RabbitMQ, LiveKit (WebRTC)

Databases: PostgreSQL, Elasticsearch, Redis/Dragonfly, database schema design and migrations

AI and LLM: LLM APIs, tool calling / function calling, AI agents, RAG, prompt engineering, guardrails, Claude Code, Codex

DevOps: Docker, Linux, CI/CD, GitHub Actions, Dokploy, Git, Playwright, monitoring, backups

EDUCATION

Bachelor of Computer Applications (BCA), Adikavi Nannaya University 2022 - 2025

CERTIFICATIONS

Google Cybersecurity Professional Certificate; IBM RAG and Agentic AI Professional Certificate (Coursera)
Languages: English, Telugu, Hindi, Gujarati
